How this affects your energy bills

An average household would need to spend **£2,215 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £382 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2023** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

This property produces 4.2 tonnes of CO₂

This property's potential production 2.5 tonnes of CO₂

You could improve this property's CO₂ emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

Changes you could make

Step	Typical installation cost	Typical yearly saving
1. Increase loft insulation to 270 mm	£100 - £350	£145
2. Floor insulation (solid floor)	£4,000 - £6,000	£103
3. Low energy lighting	£25	£42
4. Solar water heating	£4,000 - £6,000	£92
5. Solar photovoltaic panels	£3,500 - £5,500	£695

Help paying for energy improvements
